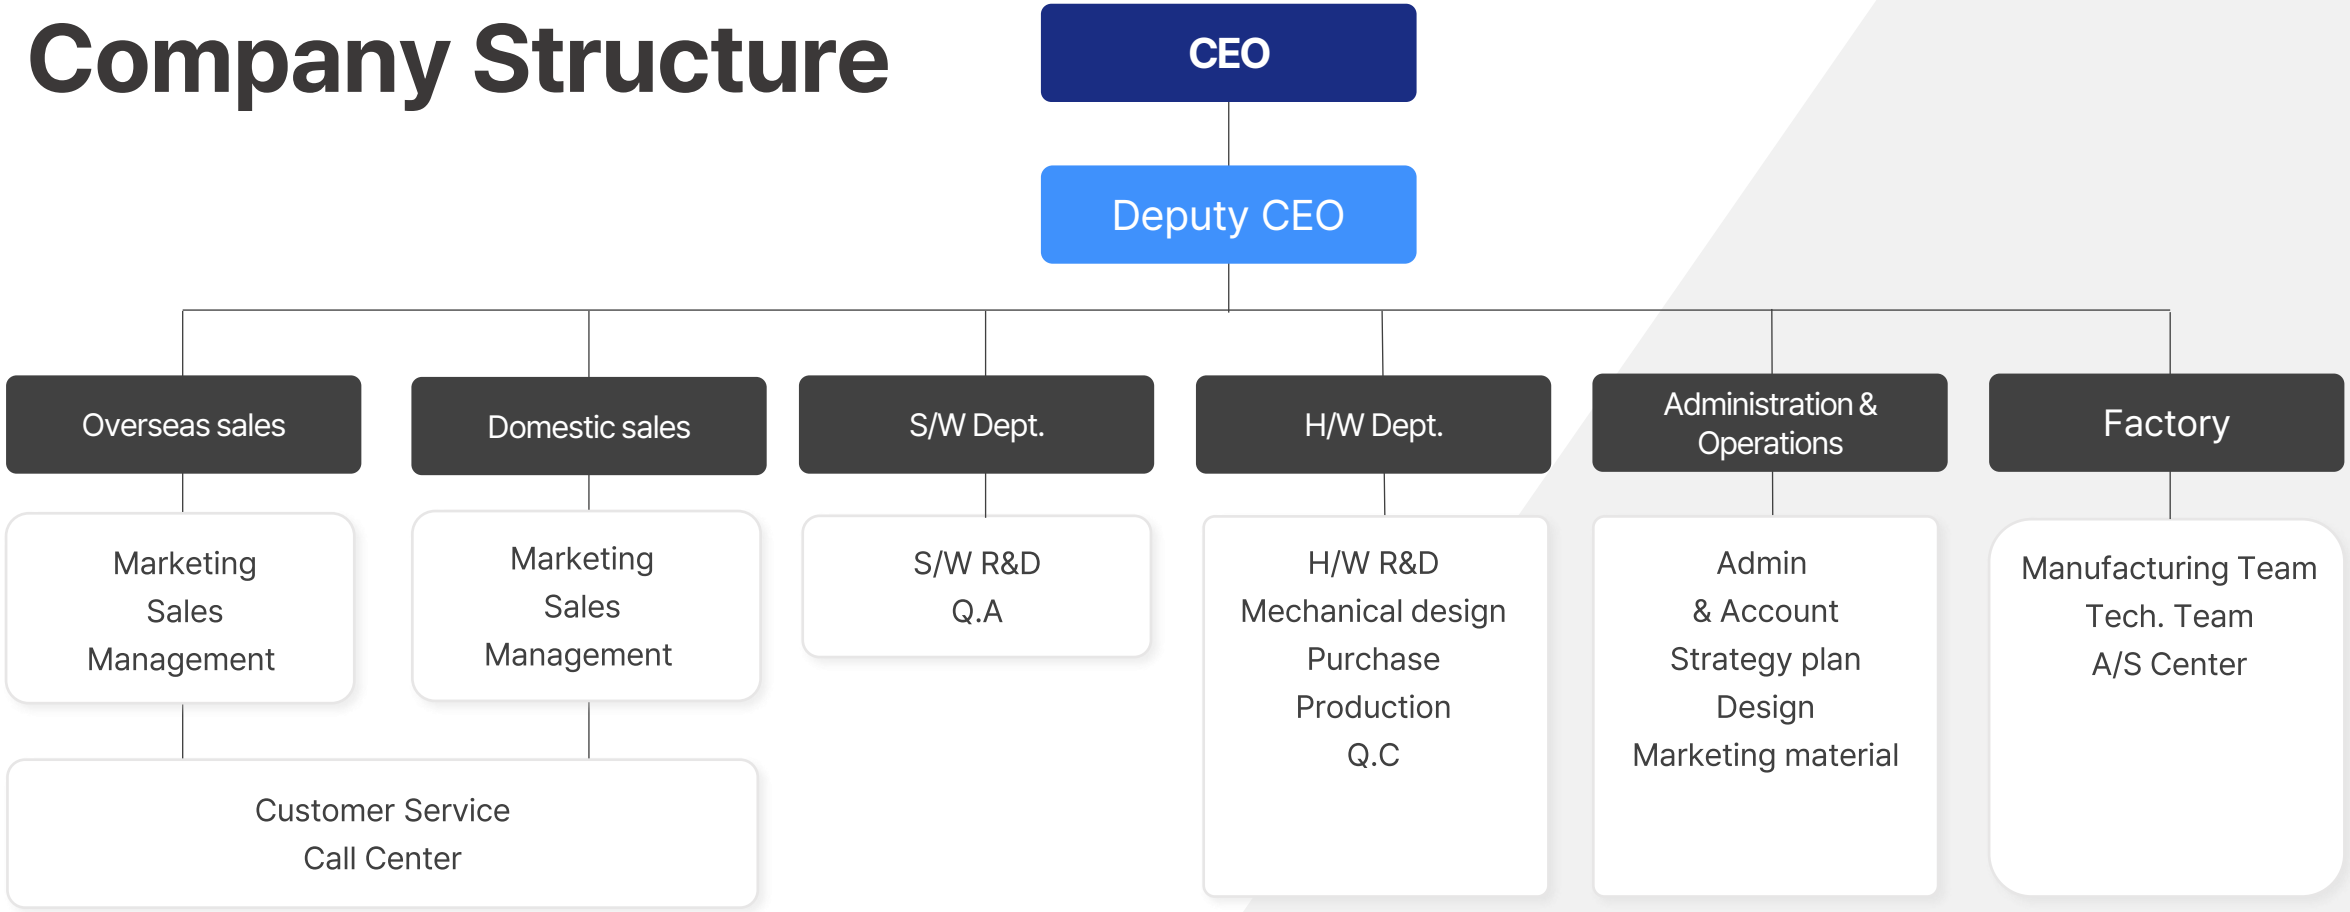
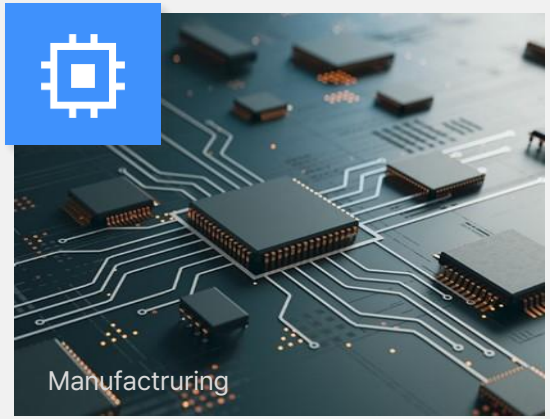
Company Structure



Business Coverage

We create added value for customers with outstanding talents and technological capabilities in each field.
We are expanding into a platform company, implementing our specialized POS system technology,
while integrating new technology such as AI, cloud and data, etc., based on our accumulated experience in the POS field so far.



Hardware

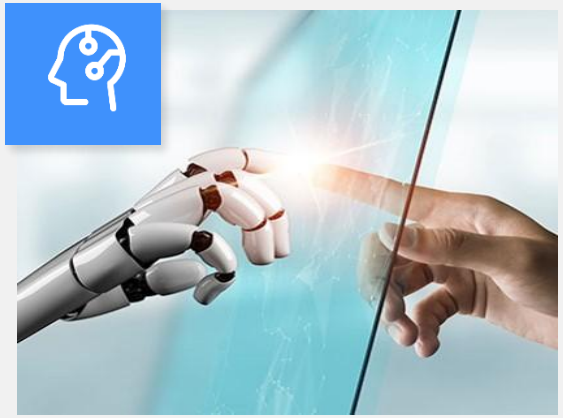
- POS, KIOSK, Ordering terminal
- Product planning > Development > Manufacturing > Sales

Software

- Cloud-based real-time integrated management system with POS, KIOSK, which enable to operate from Tablet / Smart phone

Service

- Technical Support Center
- Product Repair Center

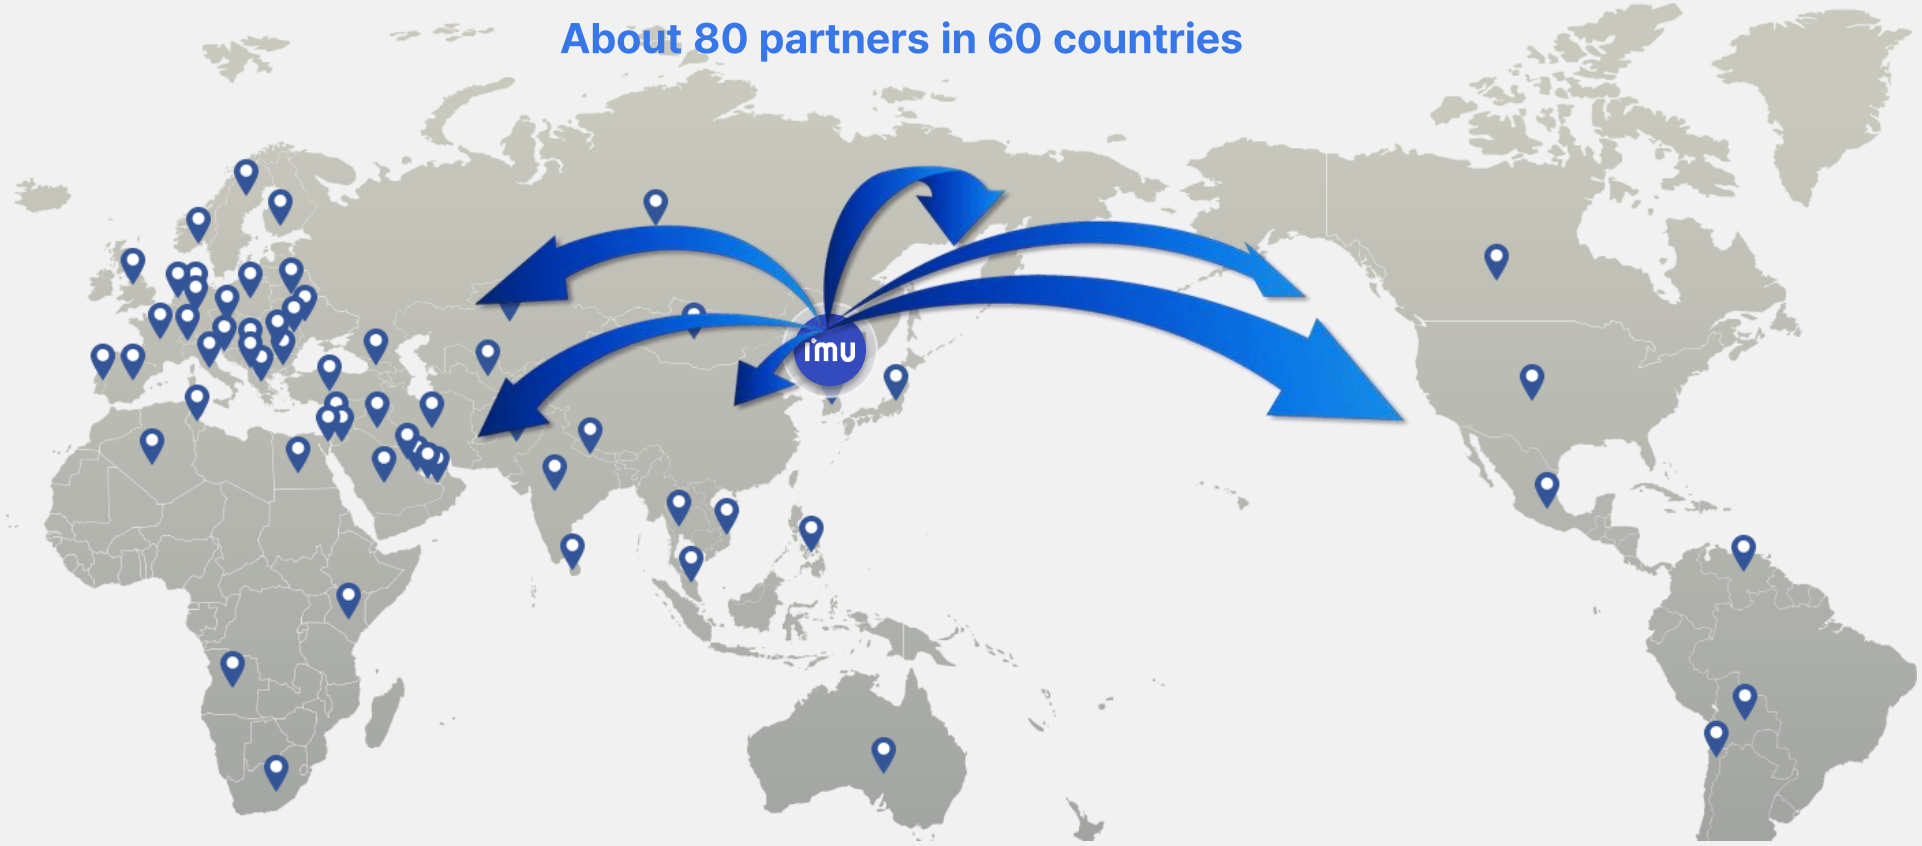


AI

- Future-oriented solution: Voice AI KIOSK, Video AI KIOSK

Global Business

IMU is only one company who can supply h/w and s/w of POS and Kiosk solution in Korea.
With one package solution, we can provide language, currency,
TAX support for various vertical markets for the purpose of utmost efficiency.



Competitiveness

Only 1. IMU

Total Service

We can provide total service including hardware, software, and services.

Global Solution

We have a global solution capable of accommodating country-specific languages, currencies and taxes.

Hardware Technology

We can offer overwhelming hardware technical expertise based on our accumulated experiences.

Headquarter & Manufacturing site

We operate a customer experience showroom, offering hands-on experiences with the latest solutions and providing consulting services in an open environment.
